Lesson and Course Management

Learner Development
- Preparation of the student for a distance education experience
  - What to expect in this learning environment
  - Locus of control/self-directedness, and computer self-efficacy inventories (Readiness)

Learner Development (cont.)
- Pre-course and “in-class” support
- Library and computer accounts
- Bandwidth issues
- Sending and receiving assignments
- Financial assistance
Managing Information Resources

- Communications and support systems should accommodate the academic and instructional design decisions
- Quality standards affect the system design and technologies
- Training?—Interplay of human resources and technological, programmatic, and fiscal constraints

Management Checklist

- Create a list of support needs of faculty and students
- Create a list of copyright considerations
